02 Wax Away Unwanted Hair for Good

WAXING IS ONE OF THE EASIEST AND QUICKEST WAYS TO GET RID OF UNWANTED BODY HAIR. BUT EVERY TYPE OF HAIR REMOVAL HAS ITS DOWNSIDES—WAXING CAN BE SOMEWHAT UNCOMFORTABLE AND THE RESULTS ARE NOT LONG-LASTING.

THE INNOVATION A new enzyme-based formula, known as the **Depilar System**, is used directly after waxing to inhibit hair growth.

HOW IT WORKS Safe to use on all skin types and hair colors, the Depilar System contains two enzymes, trypsin and chymotrypsin, that halt new hair growth. Applied by a professional, the two-step gel destroys the open hair follicles by breaking down the cells that produce hair, housed in the bottom of the follicle. The Depilar System, which will add about 10 minutes to your regular hair-removal treatment and needs to be applied every four to six weeks over a 12- to 24-month period, can also be used with other modes of hair removal like sugaring, threading and tweezing.

 **COST** Starting at \$20 for upper lip, depilarsystem.com

03 Hair-Care Products That Also Treat Acne

AFTER 20 YEARS OF TREATING ACNE PATIENTS WHO DIDN'T RESPOND TO VARIOUS COURSES OF ACTION, NURSES CATHERINE PARKER AND DOREEN CAMPBELL LOOKED BEYOND MEDICATION, TOPICAL PRODUCTS AND EVERYTHING ELSE IN BETWEEN, REALIZING THAT THE DENSE FORMULAS AND HEAVY INGREDIENTS IN HAIR-CARE PRODUCTS WERE OFTEN THE CAUSE.

THE INNOVATION The duo created something that didn't exist: a line of hair-care products that target acne at the source, since breakouts can be caused by products that exacerbate oil production and clog pores. **Kairos Acne Care Solutions** is a seven-piece collection consisting of a daily-use shampoo and conditioner, a bi-weekly treatment and styling aids suitable for all types of acne. "Many people don't make the connection between acne and hair products. They may switch to something that's more drying, but it doesn't make the hair look good. And, once they go back, they break out again," says Parker.

HOW IT WORKS Unlike the oils that are found in most shampoos, the system employs natural, noncomedogenic oils like tea tree, lavender, sweet almond and chamomile, to soothe and balance the skin without clogging pores. "We added salicylic acid to fight existing acne, and all the products contain botanical ingredients so you can have healthy hair and clear skin," says Campbell.

COST Starting at \$18, kairosclear.com
