

DEPILAR SYSTEM™

DEPILAR SYSTEM NEWSLETTER / 001

JUNE 8, 2009

Not Just a Regular Upgrade.

The Next Generation of Enzyme-Based Hair Removal Is Finally Here!

After more than a year of research and development the Depilar System is available and ready for sale with many improvements that we know you and your clients will love. The Depilar System is the most affordable and efficacious method on the market for the reduction of unwanted body hair for all sexes, races, colors and types of hair.

Available only to professionals, the new Depilar System is still a post-waxing (or any method that removes hair by the root such as sugaring or threading) treatment but now has improved efficacy. Using the research and our experience from previous generations of enzyme-based hair removal, the Depilar System combines the proteolytic enzymes Trypsin and Chymotrypsin. The two enzymes have been studied and found to create synergistic properties that enhance the efficacy of each other. The new improved product works better and improves end results over 12 to 24 months of treatment compared to other enzyme products on the market and costly laser treatments. As always, the Depilar System results depend on individual target areas, hair growth cycles, follicle quantity, and hereditary hair traits of the client.

The new advanced Depilar System is simple to use, and yet yields results that are anything but ordinary. The Depilar System uses natural enzymes and has been thoroughly tested for any adverse effects on humans and is well tolerated, gentle and efficient with no side effects.

Available to
Professionals
ONLY

Special Launch Offer

Get rid of more hair with more product at a lower price!
For Depilar System's US launch during the month of June:

- Buy 12 kits get 10% off
- Buy 24 kits get 25% off

Good Things Come in Better Packaging.

Responding to the needs of our customers, the Depilar System now comes in 10ml airless pump dispensers. You now get twice the amount of product in an easy to dispense container. More product per kit allows for more treatments. The easy to dispense airless pump makes it easier to gauge the amount of Depilar System used resulting in no wasted product. More product per kit and utilizing recyclable materials make Depilar System eco-friendly. We also are introducing an innovative recycling program where customers who recycle our packaging receive discounts.
