

DEPILAR SYSTEM™

DEPILAR SYSTEM NYHEDSBREV / 003

MARCH 26 2010

Reduce Reuse Recycle or should we say Retrieve Return Redeem?

With spring well on its way we are finally coming out of our cocoons. We are rediscovering the nice outdoors and remember why it is so important to care for our beautiful planet. At Norlab USA we continuously try to decrease our environmental impact. We try to be future friendly so that generations to come can enjoy nature too. On that note we would like to inform you of our recycling program.

But we need your help

If you send back one empty Depilar System kit, we will give you a 10% discount on another newly purchased kit. Our recycling initiative has so far only been implemented in the US. If you are a US customer all you have to do to participate is to contact us and we will send you the shipping slip you need to return your used kits - free of charge.

All of our packaging material is recyclable (and where possible made from recycled material). So we encourage you to save your caps, tubes, pumps, lids, and inserts and redeem them for a healthier planet and a better price. Like that we can all take part in a responsibility evolution and be agents for change.

E-mail us at info@norlabusa.com or call us to order!
877-GO-DEPILAR in the US, +1-818-641-1065 internationally.

When you send your empty Depilar System kits back to us, we completely disassemble the packaging and pumps. All parts are then directed to the appropriate recycling center, where they can be reused.

Benefits of Recycling

- Reduce plastic dumped in oceans
- Reduce waste going into landfills
- Conserve resources
- Reduce emissions
- Save energy
- Save water
- We want to hear your opinion!

As part of our environmental efforts we have considered the impact of making print copies of our professional brochure. We would like to engage you in this decision and hear your opinions. By continuing to send these brochures as pdf files we can save resources and emissions.

However, if you would like to receive the professional brochure in print we will accommodate your wishes. If you would like to share your opinion, please [click survey](#) and answer this question. We appreciate your contribution.
